

1 **Abstract of Disclosure**

2 A grip is provided for a ratchet. The grip includes a substrate, a coating
3 and bonding points. The substrate is formed of cloth. The coating is
4 formed of latex foam, thermoplastic elastomeric foam, rubber or natural
5 leather. The bonding points are evenly distributed between the substrate
6 and the coating for bonding the substrate and the coating. The bonding
7 points obstruct movement of water from the substrate to the coating when
8 subject to pressure.
